

# I-405 Project Team

## ***Who Leads the Project Team?***

The I-405 Project Team is led by three people. Together, they are responsible for the overall direction of the project, for making the Big Picture decisions within the organization, for making recommendations about the project to WSDOT, and for representing the project to the Executive Committee, Steering Committee, WSDOT Executive Oversight Committee and other external and internal audiences.

### ***Craig Stone, Project Director***

As Project Director, Mr. Stone is ultimately responsible for the success of the I-405 Project. Reporting to WSDOT's Urban Corridors Office Administrator Dave Dye, Craig makes the final decisions on behalf of the project and is the project's primary representative to external audiences, such as local, state and federal elected and appointed officials. Craig is the primary media spokesperson for the project.

### ***Kim Henry, Chief Engineer***

425-456-8539, [henryk@wsdot.wa.gov](mailto:henryk@wsdot.wa.gov)

Kim Henry's primary role is to ensure the project organization runs smoothly. In close cooperation with Steve Quinn, Mr. Henry works with project managers to make sure they have the resources necessary to meet production deadlines within budget. As a longtime WSDOT employee, Kim is also a liaison to WSDOT staff outside of the project.

### ***Steve Quinn, GEC Project Manager***

As part of the leadership team, Steve Quinn's most critical role is to ensure that the work gets done. He's the taskmaster who marshals the forces and monitors the overall schedule and budget. As GEC Project Manager, Mr. Quinn is also responsible for overseeing the many consultant firms that comprise the General Engineering Consultant team.

*The I-405 Project Offices are conveniently located next to the Bellevue Transit Center.*

## ***What is a General Engineering Consultant?***

The General Engineering Consultant (GEC) is essentially an extension of the WSDOT staff, hired specifically to help manage the delivery of the I-405 program. GEC staff is called upon to perform tasks that, traditionally, WSDOT staff have performed. The GEC approach offers WSDOT the advantage of top-quality staff for a time-limited period and at a negotiated, fixed price. The GEC team for the I-405 Project is led by HNTB, HDR and Parsons Transportation Group; additional member firms are McGowan Environmental, Mirai & Associates, Wilkinson Ferrari & Co., PRR, Anchor Environmental, Certified Land Services, and Wilbur Smith Associates.
